

Colorado College Social Action Institute

This .25-credit mentored internship program offers students an opportunity to engage in activist and/or advocacy work focused on one of three tracks:

- Community organizing (labor, immigrant rights, criminal justice)
- Environmental justice organizing
- Immigrant detention work and movement lawyering

Students will engage in work that aims to confront escalating surveillance and criminalization of BIPOC communities by collaborating directly with community-based organizations in the U.S. Southwest.
